Re: Wayne Township Public Schools  
Early Childhood Center School: New Classrooms Building  
**Request for Proposals for Consulting Services – Geotechnical Investigations and Soil testing**

Ms. Statuto,

It has come to our attention that an addendum should be included for the Geotechnical Engineering RFP currently out for responses. Please provide an addendum that will include the following clarifications:

The following are building code and stormwater manual updates that must be communicated to the RFP recipients for the referenced RFP.

- 1) For infiltration testing, it is indicated under Section K, note 3, subsection g that soil permeability class ratings are determined by "Appendix E of the NJ Stormwater BMP Manual." This has been updated to NJ SWBMP April 2022 Edition, Chapter 12 for stormwater testing.
- 2) It is indicated under Section K, note 4, subsection j, "recommendations for the IBC 2018 Site Coefficient based on soil profile, to be used for seismic design." The updated NJ code is IBC 2021 NJ Edition.

The updated information must be incorporated into the RFP responses.

Regards,
